

PALETpulp 60x40

· Pallet made of paper pulp, suitable for promotional displays:

Characteristics:

- Weight: 700g
- Dimensions: 600x400 mm
- Two way entry

Ecological, 100% made of paper waste, recyclable and biodegradable.

Easy to handle and user-friendly design.

Stackability results in less warehouse costs.

- PALETpulp 60x40 is a cheaper and user-friendly substitutive for timber or plastic pallets that can be used as promotional displays and PLVs.
- PALETpulp 60x40 has an entirely closed surface which provides greater isolation between the floor and the cargo.
- It does not have any nails or staples that might damage

Costumized products

Since 1992 our staff has developed the best protective packaging solutions for products with specific transport and storage requirements.
